# SuperEasy KiwiSaver Superannuation Scheme and SuperEasy Scheme

## CURRENT PIR TAX RATES AS AT 31 MARCH 2021

**What is your Prescribed Investor Rate (PIR)?** Your PIR is the rate of tax that is charged on your investment income (your PIE income) in your SuperEasy Kiwisaver Superannuation Scheme and SuperEasy Scheme. The amount of tax that is charged depends on the amount of income you have been earning in either of the previous two income years ending 31 March. This allows you to select the year you earned the lowest income which could allow you to select a lower PIR. However, it is up to you to advise us what rate we should apply to your account. Depending on the level of your taxable income you can have your investment income in the schemes taxed at 28%, 17% or 10.5%. If you do not advise us of a rate, we will apply the top rate of 28%. The less tax paid on your investment income means there will be more in your account balance, so it is important you let us know we have your correct PIR recorded against your account.

**What is a PIE?** Both of our schemes; SuperEasy KiwiSaver Superannuation Scheme and SuperEasy Scheme are portfolio investment entities (“a PIE”) which in general terms will allow tax to be paid on the members’ behalf. The tax that is paid is called the member’s Prescribed Investor Rate (PIR).

### How do you determine your PIR?

- If you have no investment income from a PIE (eg SuperEasy KiwiSaver Superannuation Scheme and SuperEasy Scheme) please refer to **Table 1**. This may be because you are joining a KiwiSaver or Superannuation Scheme for the first time and you also do not have any funds invested in a PIE at a bank or other financial institution.
- If you have any investment income from a PIE (eg SuperEasy KiwiSaver Superannuation Scheme and SuperEasy Scheme) please refer to **Table 2**. If you are a member of a KiwiSaver or Superannuation Scheme, you will have investment income from a PIE. You may also have funds invested in a PIE at a bank or other financial institution.

**TABLE 1:** (This applies to taxable income in either of the previous two income years ending 31 March. This allows you to select the year you earned the lowest income which could allow you to select a lower PIR)

If your taxable income was: (And you have no investment income from a PIE)	Your PIR
\$0 - \$14,000	10.5% (Low)
\$14,001 - \$48,000	17.5% (Mid)
Over \$48,000	28% (Top)

**TABLE 2:** (This applies to taxable income in either of the previous two income years ending 31 March. This allows you to select the year you earned the lowest income which could allow you to select a lower PIR)

If your taxable income was:	And if the combined total of your taxable income and PIE income was:	Your PIR
\$0 - \$14,000	Under \$48,000	10.5% (Low)
\$0 - \$14,000	Over \$48,000 and Under \$70,000	17.5% (Mid)
\$14,001 - \$48,000	Under \$70,000	17.5% (Mid)
\$0 - \$48,000	Over \$70,000	28% (Top)
Over \$48,000	Over \$48,000	28% (Top)

### Why your PIR might change:

- If your income thresholds have changed and you wish to change your PIR as per the above table, please advise us accordingly.

### New Members:

- When completing our Application Form you advise us of your PIR by ticking the appropriate box. If you do not advise us of your PIR then the top rate will be applied to your account until we receive advice from you telling us, you wish to change your rate. **NB you cannot backdate your PIR.**
- If you joined through the automatic enrolment process and have not completed an Application Form, you will be given the top PIR.
